Filtermaterial
 Aktive Bio-Filtermaterial ‚System Biologic‘

Brand:

Specification: Natural substrate based on coconut fibres (Cair) and specially adapted microorganisms.

Microorganisms: Active enzymes and strains of the Bacillus subtilis Group, accordingly to the regulation B 006 classified as absolutely safe for man and nature. Permanent controls guarantee a high standard.

Ingredients: Water retaining buffers, pH stabilizers.

Shelf life: Up to three years when stored dry and at temperatures below 50° C.

Application: The filtermaterial must be wetted, in order to activate the microorganisms and completely fill the chambers by maceration.

Disposal of filtermaterial: By the bio bin as organic waste.

Outdoor Typ B

100 g

Outdoor Typ C

105 g

Weight dry per set:

Life time Outdoor :

After two years the filtermaterial must be changed.

Indoor Typ A

10 g

Indoor Type D

15 g

Weight dry per piece:

Life time Indoor:

After four months the filtermaterial must be changed.
